

Custom Point of Interconnect Systems for Medium Voltage Electricity Distribution

Our Point of Interconnect system includes any or all

- Metering
- Switches
- RTUs
- Communications
- Back-up power

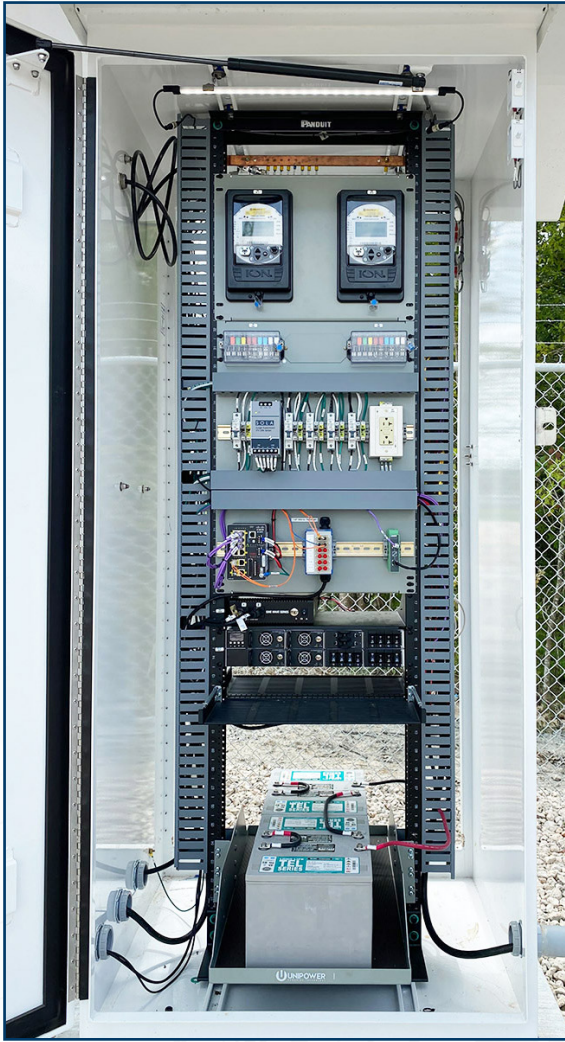

Advantages

- All components and back-up power are integrated in a single all-aluminum cabinet; single source fabricator/integrator; complete turn key system
- Custom engineered for specific site requirements
- Completely assembled, wired and tested to minimize field installation time and eliminate errors
- Ready to connect on-site
- Five year warranty on system; Batteries have a pro-rated warranty

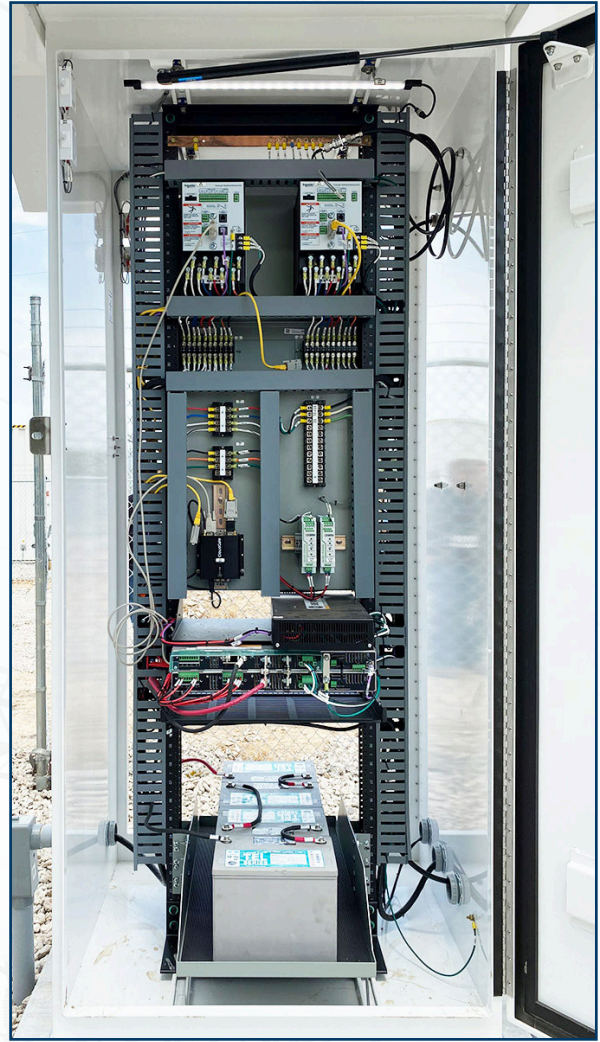

For more than twenty-five years, Solarcraft has been fabricating and integrating best-in-class electronics and power cabinets, buildings, and shelters that protect equipment, and make field work easier and safer. We work with end-users and their engineering firms – to get the job right.

At our facility in Sugar Land Texas, we have a complete metal fabrication shop, electrical wiring department, engineering department, power experts, and field technicians – working together to deliver a turn-key solution.
