

● Integrated DC-UPS System for Remote Terminal Units (RTU's)

SOLARCRAFT
POWER PRODUCTS

Developed in conjunction with pipeline field engineers, Solarcraft's DC-UPS RTU system is designed to accommodate your Bristolfi 3330, ControlWave or other RTU.

The enclosure is a 65" high double wide Uni-Box, fabricated of 1/8" aluminum, welded construction, with white powder coat finish for superior corrosion resistance and heat reflection. The system has two 110-Ah batteries as standard equipment; two additional batteries can be included for extended back-up. Your Bristol display is mounted in the door and connected with a data cord.

Advantages

- w High-quality powder-coated aluminum enclosure does the work of three enclosures by housing power supplies, batteries, and RTU.
- w Allows complete pre-assembly, wiring, and testing; thus minimizing field installation time and errors.
- w Integral mounting feet and lifting eyes to facilitate installation.
- w Single source supplier; one stop shop.
- w Five year full warranty.
- w Redundant power supplies.
- w Low Voltage Disconnect (LVD) feature prevents battery damage from over-discharge.
- w Temperature compensation for maximum battery life.
- w Room for two additional batteries for longer term back-up.
- w Backplane layout allows easy service and troubleshooting.
- w Accommodates ControlWave and older 3330 RTU's.
- w Digital door display at a convenient height.
- w Enclosures in stock for quick turnaround.
- w Both solar or DC-UPS configured systems.
- w High-quality system at a lower cost.
