Rugged Security Solutions
Cameras with Solar/UPS Power and Communications Integrated in One Tough Package

All-in-one solar or line powered camera systems with battery backup and communications, utilizing Verkada's intelligent video cameras.

- Provides reliable off-grid solar power or UPS for security cameras and motion sensor technologies, perimeter monitoring, gate monitoring, and intrusion detection.

- Rugged secure enclosure houses single or multiple cameras, batteries, and communications.

- Enclosures are rated for indoor and outdoor applications.

- Solar power is easy to install, with systems arriving fully integrated; no utility cabling or trenching required.

- UPS battery bank powers the system during power outages or if power is cut.

- Solarcraft 5-Year Warranty on system materials and workmanship.

Solarcraft™
THE POWER OF QUALITY

Solarcraft, Inc. | solarcraft.net | 877.340.1224 | sales@solarcraft.net

Our secure enclosure and solar array can withstand harsh weather conditions year round. Accurate system sizing ensures uninterrupted power while optimizing the life of the battery bank.

Solarcraft specializes in building integrated Solar and UPS continuous power systems for critical, outdoor, or remote electronics applications.

Solar power is an excellent option for site security out at a baseball diamond or soccer field, or in an area where line power is not economically accessible, Solar provides reliable, continuous, low maintenance power that is also quiet. When sized correctly for optimal year-round performance, a solar power system and battery bank will operate for many years, requiring only annual battery check-ups.

Solarcraft UPS systems protects assets and infrastructure by continuously powering essential on-site security systems just about anywhere traditional utility power is available. A Solarcraft UPS and battery bank will keep your cameras operating even when utility power fails. The duration of backup can be specified based on the application and level of security required.

Verkada's Intelligent Video Security is built to simplify investigations in tough environments.

Key Features:

- Highly durable, vandal resistant form factor
- Indoor models with IK08 rating
- Outdoor models with IP67 and IK10 rating
- Up to 365 days of retention in standard quality video
- High–sensor resolution up to 4K
- Edge processing for Motion, People, and Vehicle Analytics
- 128GB – 2TB of on-board storage
- Low–bandwidth impact, only using 20–50 Kbps per camera at rest
- All Verkada hardware purchases are backed by a 10–year limited warranty. For more information, visit verkada.com/support/end-user-agreement.

Dome Series

Verkada's Dome Series delivers enterprise–grade security in a wide range of models for any indoor or outdoor environment. These hybrid cloud cameras feature a durable, vandal–resistant design, with sensor resolutions up to 4K.

Bullet Series

The Bullet Series' powerful processing delivers advanced computer vision features including Verkada's edge–based People and Vehicle Analytics. Bringing speed and efficiency to investigations, footage is processed directly on the camera, meaning results are nearly instant and always accessible.
